Dr. Robert D. Hartman, Ph.D.
President
Classic Caladiums, LLC

Micropropagation – Selected Clones

Some of the caladium varieties have been vegetatively propagated for more than 150 years.

To ensure that our customers are receiving true to name vigorous tubers Classic Caladiums employs a certification program to make sure our starting stock, based on the results of specific tests, is of the highest quality. Classic certifies its starting stock to be; 1) true to name 2) free of specific diseases and 3) rejuvenated.

Virus Indexing – Keeps Original Vigor & Color

COLOR without flowers

Cultured

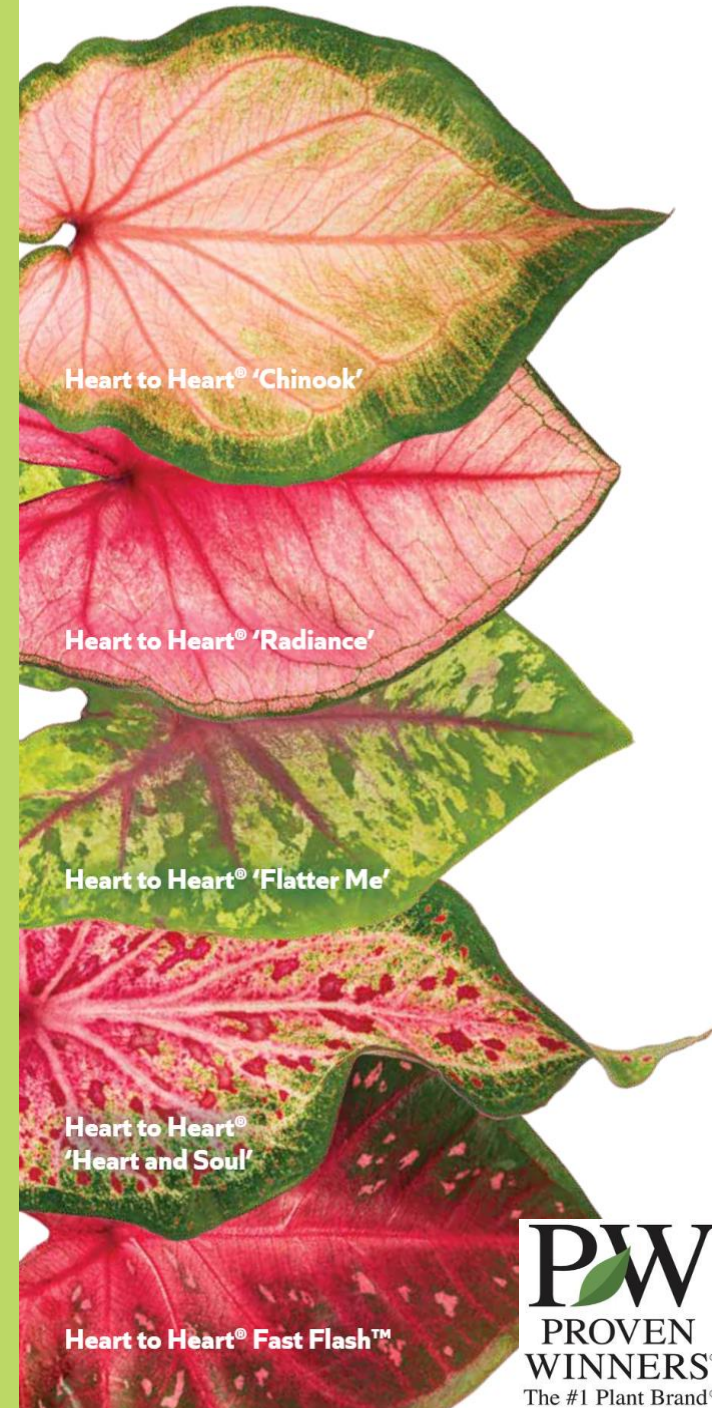

The world's #1 producer of caladium bulbs is constantly developing new cultivars with unique genetic profiles like no one else.

Colorful

Scarlet. Rose. Bronze. Burgundy. Violet. Classic Caladiums offers over 100 caladium varieties in a rainbow of colors ranging from subtle to sensational.

Constant

A caladium's bold color comes from its gorgeous, variegated foliage. Bloom time, what's that? Caladiums are always in color, all season.

Proven Winners Heart to Heart Caladiums

- All de-eyed and painted bulbs
- Planting instructions English & Spanish
- Winterized boxing- Temp control trucking
- Instant & Long-lasting color
- Combo component Thriller to Filler
- Excellent in Shade or Sun
- Not a water hog
- Displays on carts for good shelf life
- Versatility, Unique and Different - a Win for Consumers

PREDICTABLE PERFORMANCE

No more guesswork
with **painted and**
de-eyed bulbs.

Heart to Heart™
'Hot 2 Trot' Caladium

Heart to Heart™ Caladiums

Sometimes predictability is a good thing. Take uncertainty out of the production equation and insert the confidence to produce full finished crops every time when you start with our painted and de-eyed bulbs grown by renowned supplier, Classic Caladiums. We're proud to offer twenty of their most unique, top performing selections new this year.

De-Eyeing is the removal of the dominant eye which promotes growth of multiple lateral eyes that generate more leaves, less stretching and fuller pots.

DE-EYEING PROVIDES:

- Table top crops
- Better pull ratios
- Fit more plants per rack
- Better sell through at retail level

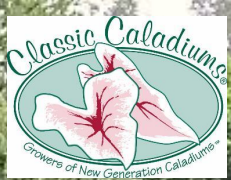

Painting bulbs with non-toxic paint allows for rapid and accurate bulb orientation during the potting process.

Painting provides:

- Increase throughput on the potting line
- Bench row running when shipping
- Less shrink at retail due to better proportioned pots

Rooted

Classic Caladiums is rooted in the science of growing caladiums. We are constantly developing new genetic lines, resulting in varieties that are hardier, more sun tolerant, and faster growing. We've already introduced more than 90 new caladium varieties over the past 25 years and have hundreds more in development.

Reliable

Every crop is at the mercy of nature, and caladiums are no different. From better irrigation to protect against drought to unique-to-the-industry raised beds that guard against flooding, we've taken measures to ensure we can reliably fill orders no matter how turbulent a growing season might be.

Resourceful

We are actively building the caladium industry through constant innovation. Our team has regular brainstorming meetings to come up with new ideas: new varieties, new partnerships, new growing techniques. Our willingness to experiment and try new things keeps us on the cutting edge of our industry.

Why count on the largest caladium grower in the world?

Heart to Heart®

*Christmas
Caladium™*

The perfect giftable, Proven Winners® Heart to Heart® Christmas Caladium™ is a festive addition to indoor holiday decor.

Deck the Halls

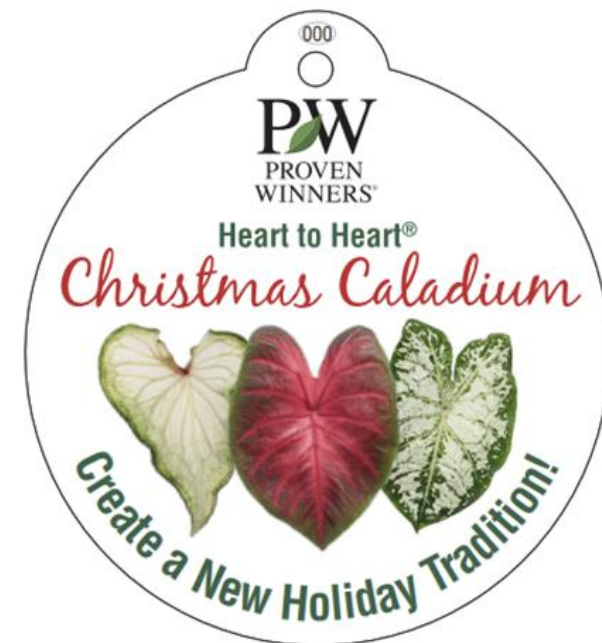

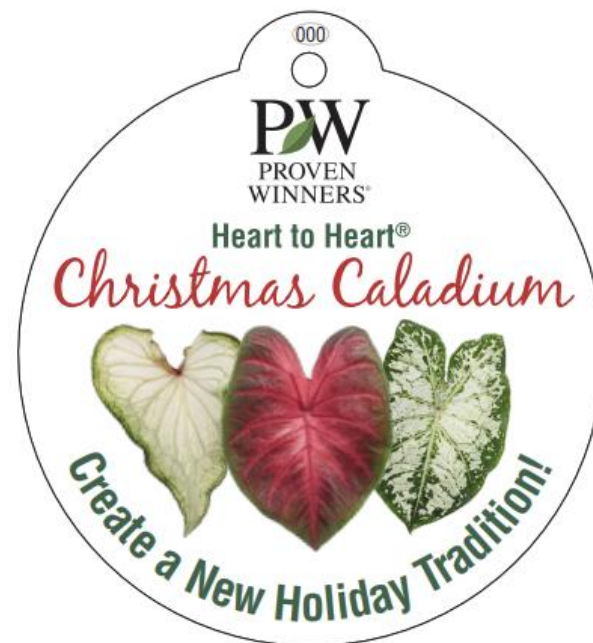

WITH CHRISTMAS CALADIUMS

- Great supplement for the season of Christmas
- Stunning foliage patterns
- Several unique holiday colors
- Unique ornament tag shape
- Crop time advantages for grower
- Using cooler stored bulbs

Consumers love choices and color options, so they shouldn't be limited to just Poinsettias as a classic Christmas gift. Let's give consumers exciting new options and start a new tradition with Heart to Heart® Christmas Caladiums. Stunning foliage in shades of red, white, and green, Christmas Caladiums offer a festive alternative. These plants make less fussy houseplants, are easier to care for, will last well through the season, and have tremendous impulse appeal with consumers looking for new ways to decorate for the holidays.

Our Christmas Caladiums pilot program over the past two years has demonstrated strong demand and sell-through. Ready to join us as we begin to offer a new holiday tradition to consumers?
